About Me

Proficient in technologies including JavaScript, Html, Css, MySql, Java. Completed several projects that have allowed me to develop my skills in building complete, end-to-end web applications. Hard-working and dedicated individual with a passion for technology and a desire to continuously learn and improve.

Projects

1. My-Portfolio (ReactJS)

Description: A personal project developed using ReactJS to showcase my skills, projects, and experiences. Features dynamic content management, responsive design, project showcase, skills highlight, and a contact form.
Tech Used: ReactJS, HTML, CSS, JavaScript, Bootstrap, Git.
Link: [GitHub repository or deployed website]
Key Takeaways: Built with ReactJS, My-Portfolio highlights my skills in front-end development and responsive design. It offers a user-friendly interface to present my credentials effectively.

2. RealEstate (ReactJS)

Description: RealEstate is a ReactJS project mimicking a real estate listing platform. Features include property listings with search and filter options, responsive design, interactive maps, and user authentication.
Tech Used: ReactJS, HTML, CSS, JavaScript .
Link: [GitHub repository or deployed website]
Key Takeaways: RealEstate project enhanced my skills in ReactJS and front-end development, focusing on dynamic interfaces, responsive design, and user authentication features.
